
MetaTrader Mobile iOS terminals availability on the Apple AppStore

Dear Clients,

As a result of Apple's unilateral decision beyond MetaQuotes' control, MetaTrader 5 terminals for the iOS operating system cannot be downloaded from the Apple App Store as of 24.09.2022.

This process only affects new users of the apps, while existing users can continue to use iOS apps.

We strongly recommend you not to delete your existing MetaTrader applications on your mobile devices.

New iOS users or users who have deleted the application can continue to use the application through the mobile version of the web platform. As a company, we recommend the desktop version for the best user experience.

MetaTrader Mobile terminals for Android remain unaffected and are available in the Google Play Store.
