

## Decision on determining contract trading groups about CFDs on the MT5 platform

Decision on the designation of trading groups for trading contracts for differences on the Metatrader 5 platform from March 1, 2022. is put out of force, which means that by trading and reaching a certain amount of money on their Equity on the Metatrader 5 platform, clients cannot move to the next group.

Clients can only reach a certain group by making a single payment of money, and they cannot move to the next group by reaching a certain amount of Equity on the Metatrader 5 platform, as it was foreseen by the above-mentioned decision.

Trading groups remain same as before:

1. Standard - basic group without a minimum amount of money
2. Silver with a minimum cash amount of \$ 1,000.00
3. Gold with a minimum cash amount of \$ 10,000.00
4. Platinum with a minimum cash amount of \$ 20,000.00

In order for the client to be able to trade, it is necessary to pay at least € 100, which will automatically classify him in the Standard trading group.

Limit Prime Securities does not charge a commission for any of the trading groups, i.e. a commission for opening and closing positions.

Trading groups differ because they have different SPREAD, whereby by paying a larger amount of deposit and moving to the next group, the client has a more favorable SPREAD for trading with Limit Prime Securities.

In order for the client to move to the next group, it is necessary for his individual payment on the Metatrader trading account to be in the total amount of money as stated above.
